

David Goldfarb

STRATEGIC TECH SERVICES

SERVICES

Guide teams to achieve short-term goals and successful exits

Simplify complex tech challenges

Develop POCs, prototypes, and MVPs

SKILLS

Software development from concept through deployment

Due diligence and tech-stack evaluation

Rapid knowledge acquisition

Arsenal of proven techniques

EDUCATION

MIT

Bachelor of Science, Computer Science and Engineering

EXPERIENCE

DEGEL SOFTWARE — FOUNDER AND PRESIDENT

Founded and led a software boutique excelling in new technology adoption. Key achievements include AOL's early mobile instant messaging clients, Orange UK's pioneering push-to-talk (PTT) mobile service, and Vringo's IPO. Supported numerous other companies, driving innovation and growth.

BASIS TECHNOLOGY — PRINCIPAL SOFTWARE ENGINEER

Designed and built *Adaptation Studio* and *Identity Studio* NLP front ends. Created *Cyber Events* prototype. Spearheaded adaptation of ChatGPT/LLM techniques.

VRINGO — COFOUNDER AND CTO

Restructured Degel's core engineering team to kickstart this successful startup, steer their mobile products through the emergence of modern smartphones, and guide them to their IPO four years later.

2AM — COFOUNDER AND VP TECHNOLOGY

Directed and developed the core *Creation* engine, which supported scripting and the runtime environment for a massively scalable distributed game platform with over 250,000 users in the 1990s.

OTHER MAJOR CLIENTS

AOL, ICQ, Intel, Israel Aircraft Industries, Sun, National University of Singapore, Orange UK.
